

Volunteers

Thanks to our army of many wonderful volunteers without whom we wouldn't be able to do all of the animal care, admissions, education, and outreach work that keeps the Center going. These dedicated individuals work with a smile on their face to keep our animals as comfortable as possible while being rehabilitated. Cage cleaning, habitat maintenance, cage building, preparing foods, animal intake, and assisting with exams are just a few of the many jobs our volunteers take on. Between volunteers and Interns a total of 5,065 hour of animal care were given to the CFW in 2007. We welcomed 25 new volunteers to bring our total to 75 volunteers! Special thanks to the following volunteers who ventured from 21 communities in ME and NH and logged over 100 hours in 2007.

Special thanks to our Interns, Junior Staff, and Senior Volunteers who worked diligently to keep things running smoothly while the staff concentrated on special and intensive cases. Extra special thanks to our Senior Volunteers who made our Volunteer Workshops dream a reality. As always we owe much thanks to our veterinarians John Means and Gerry Beekman who donate countless hours every week to ensure that our patients are getting the crucial care that they need.

Board Members

In addition to animal care volunteers we would also like to thank our board and advisory committee members for logging 1,262 hours of non-animal care work. This includes fundraising, organization, facilities, development, outreach, and much more!
